

To all on the **WORLD PEACE ALLIANCE** list

from **Bruce Kettler**

An important question has been asked by scientists for, at least, decades. Is the aging process natural, or is it a disease? Another question, the answer to which is difficult to prove, is how did this disease start? Then, scientists have been experimenting, and seeking to know, if it's a disease, can it be cured? [Dr. Life](#) is 72 years old. His own body is a human testing ground - along with those of his patients.

Tests are showing that if aging is a disease, it can, indeed, be cured.

[Bernardo LaPallo](#) is 109 years old, and he never gets sick. He doesn't show all the signs of youth that Dr. Life does, but he is in good condition, alert, coherent, and enjoying his life.

The August 2011 issue of [Popular Science](#) contains an article about Bill Andrews who has spent two decades "...unlocking the molecular mechanisms of aging." What Bill is involved with (something that Dr. Life is also interested in) is effectively repairing the telomerase gene, in effect reversing the aging process

The article tells us how "20 years ago ...pioneering telomere biologist Calvin Harley, [spoke of how] telomeres serve as the tick-tock of the aging cell."

We can only speculate about how, and why, this telomere was placed. It seems to be a governor, much like what is placed in a vehicle to limit the speed at which it can travel. Could an [advanced civilization](#) have reengineered our human species, with lifespan and intelligence limitations, to serve their purpose of keeping humanity enslaved? Could there have been a group left on earth to continue enslaving humanity? Could they be the "elite"? We don't know, but it's all worth considering, and investigating further.

So, what does this have to do with **WORLD PEACE**? Well, the "[elite](#)" (if they are not from the race that reengineered humanity) seem to want to defeat their own aging process, but they don't want that technology in the hands of the general public. The "elite" are the promoters of war, poverty, and mass starvation.

What value is this to the free, and peaceful, people of the world? The information can help good, productive, people remain healthy far longer. Worldwide, this results in more effective, and experienced, workers for the cause of spiritual growth, liberty and prosperity.
