

## To All on the World Peace Alliance Mailing.

### You receive this mail because you requested it.

The first item to call your attention to is a video at [this link](#). It is about the result of war upon innocent civilians, especially children. It is emotionally moving to those people who still have a soul, it and it may change you forever.

Normally, we write about peace. That is because to focus on the opposite of the peace we want, often enough, contributes towards a manifestation of that opposite, which is war. However, at this time in the history of our planet, it's important to point out that the results of war are being censored by the mainstream press in America. That is because the globalists are creating war in the world to gain more control (with definite plans for which country to bring down next) and to bring a final crisis (World War III) that is for the purpose of giving them complete control of all the people on the earth, and then an extermination of the large majority of the human population. The Vietnam war ended, to a great extent, because of the showing of war's results on TV. The people just had enough. The Globalists think they can keep their wars going if they hide the results from the public.

Globalism, and The United Nations with it's phony declarations of “peace” are not beneficial to humanity. One World Government, at this time in history, means:

**END OF THE FAMILY**  
**END OF NATIONAL SOVEREIGNTY**  
**WAR**  
**STARVATION**  
**MASS MURDER**  
**TYRANNY – TOTAL CONTROL OF THE INDIVIDUAL**  
**DISEASE**  
**MANY LIES THROUGH “EDUCATION” and MEDIA**

Have you heard all the propaganda about Lybia? I know, the invasion was supposed to have been for humanitarian reasons. Supposedly, the people had been suffering, and now they have been delivered from the suffering – liberated.

Yeah, right! Liberated from legs, eyes, arms, from their face, from their lives.

Thousands are suffering physical injury, and the loss of close relatives and their homes. Cities have been destroyed. Many little children have been killed. The new “government” is bringing slavery to them, whereas they were comparatively free. [They were living in prosperity](#), and now they are mostly poor. [Watch this video](#).

They were attacked because their government was independent of the controllers who have, to a great extent, taken down the United States. If the people of that country had been against their government, there would only have been a need for ground forces. But, because many of the armed people would have fought against any invaders, in an act of cowardice, populated areas were attacked from the air.

Of course, that is a war crime.

So, what are the sides in the major conflict over the entire planet? It's a small group of people who call themselves, "elite," who have come up with the term "New World Order." So, to say such a group does not exist is obviously nonsense, because this group of people have publicly made themselves known, and have detailed their own former acts, and plans, and they even created a term, "New World Order." The other side is the people of the world. It is really that simple. It is not one country, or some ideology, or "terrorists" it is the "elite" against the people of the world.

The elite **use** ideology such as communism, or fascism, or Islam. They use races. They play one off against the other, but let's get this one thing clear. *It is the "elite" against the people of the planet.*

Do you know the meaning of the word "peace" to the elite? It is war, famine, and [mass extermination](#). Then, in their sick imagination when they have total control, it's peace for them. That is, when a huge majority of the population no longer exists, there is no threat to them, or their control. Then, they supposedly will have peace.

Now, on the United Nations. What is it? Well, it's not what many think it is. [It is not a peacemaker](#), or a producer of prosperity. Basicly, the best analogy I can use is it's a sick, puking, man spewing it's [stinking lies](#) all over the children and young people in elementary, high schools and colleges.

If you hear about "Sustainable Development" from U.N. Sources, you are listening to nonsense. The earth can sustain all the people. I hear globalists talking about how there are supposedly too many people to sustain, "why look at all the starving people," they say. Well, the **GLOBALISTS ARE CAUSING THE STARVATION**. There's more than enough food and energy for everyone, and many more, to be prosperous. So, "sustainable development," as used by the U.N. is nonsense – **PURE LIES!**

Also, the attack on Lybia I'm referring to was largely caused by the United Nations. Individual Nations have a right to be sovereign, and free of domination by a group. As for human rights violations, the United States has violated the human rights of its citizens, and much of that information is censored. Should the U.S. be bombed to oblivion because a veteran was recently shot at an **OWS** demonstration, or because of the many other violations of human rights from the U.S. Government, or it's proxy enforcers?

Now, let's get into this **GLOBAL WARMING/CLIMATE CHANGE NONSENSE**. Look at [this web site](#). Be sure and check out the links. From this material, including the links, you will see that there are **NOT** too many people on the earth.

Now, about the **INTENT** upon peace. Sometimes people need an incentive to get **SERIOUS** about their intent upon a peaceful planet. I've provided that in this mailing. Once you realize the seriousness of the time we are in, on this earth, then let all those bad images go away, and start [dwelling upon pictures and feelings of a world that is at peace](#), with much good food, and a happy group of people and animals dwelling upon it.

In Peace

Bruce Kettler
