

To all on the **World Peace Alliance** listing:

When I write that these messages are important to receive as soon as possible because they often concern world events, I realize many of you have other sources. However, you are not receiving messages from most of them about the same significance I'm showing here.

One of the rules of universal law is that when you have gratitude for anything good in your personal life, or the life of the world, more good will come. More peace, more abundance, and more freedom are drawn to you.

So, we have two axioms here:

1. Gratitude helps to bring more of the same.
(The Secret) (The Science of Getting Rich)
2. Every adversity has within it the seed of an equivalent benefit.
(Napoleon Hill)

Let us now look at this recent event. Jesse Ventura showed the people that there are concentration camps in the USA, not for the “bad guys” to be imprisoned, but rather for the “good guys.”

<http://www.wearechangehuerfano.us/cc>

That was very good for all of us, because the more exposure, the greater our power to end this tyranny.

Now, pressure from the U.S. Federal Government has come to not re-air the program. Also, they have caused TRU TV to take down references to the show from their web site.

<http://www.infowars.com/police-state-episode-of-hit-ventura-show-covering-concentration-camps-pulled-from-air/>

Adversity? Yes, because we have less exposure. Benefit? Yes, because this gives us more to expose, not only their concentration camps, but their attempt to cover it up, and the further appearance of guilt in that attempt. The benefit outweighs the adversity. This has occurred again and again, and it is how we are winning so we may regain our freedom and prosperity.

Please take another look at the World Peace Alliance site, because recent changes have been made:

<http://www.world-peace-alliance.com>

So, let us have gratitude that these true facts are being exposed to a widespread audience.

The miracle of a new world, one in which the people live in peace, freedom and prosperity, is coming about one part at a time. It is that way because a sufficient number of people are at peace within themselves, and they are confident that it is manifesting. Many of them are outwardly active in bringing this about, but the most important thing about such people is they are not obsessed with the problems, rather they are filled with a vision of this becoming a wonderful world for us all.
