**December 24, 2012**

**From: Bruce Kettler**

We, in the United States, have suffered a tragedy with the deaths of 27 people, 20 of them little children in a school shooting. The worst part of the tragedy, in my opinion, was the barrage of media propaganda that followed about gun ownership in our country.

I have placed a number of videos [on a web site](#) showing the contradictions from the media. You will see evidence of an actor posing as a grieving parent for the press. You will see evidence of more than one shooter at Sandy Hook.

Most likely pistols were used, not any so-called "assault rifle." What is it the would-be controllers want to confiscate more than anything? It is rifles which are capable of firing as fast as a person can pull the trigger. Handguns can do that, but they cannot be fired accurately at significant ranges.

Why do the would-be controllers want, more than any other, these particular weapons out of the hands of the American public, and why the single shooter story?

They want these weapons because they pose a significant deterrent to complete military occupation - absolute domination over the people of this nation. Throughout the world, and through history, genocide came about soon after disarming the people. [Go to this web page](#) and check the references so you may have evidence that this is true.

The single shooter story presents the idea of a crazy person murdering many innocent people. More than one crazy shooter is more difficult to believe.

So, who were these monsters who murdered 20 innocent children? Evidence, and history, points to them probably being government (a hidden part of government, not with knowledge of the whole government) hired. The dead one, in my opinion, probably did not shoot anyone. He's what they call a "patsy."

Where are the shooters now? Probably in U.S. Government custody, or dead having been killed because "dead men tell no tales."

This could make a person become distressed whatever part of the world you live in. But, there's

a happy side of this story. The propaganda in the U.S. Media is having an opposite effect. Instead of putting people to sleep, it is waking them up. People who had no idea what the true agenda of control in the U.S. was, are now asking questions, like “Why are they putting all this hype out in the media?” “It looks like they are using this to take the guns.” Others are buying huge quantities of guns, ammunition, and many magazines to hold the ammunition (magazines so that they can reload many rounds of ammunition in a second or two). They are buying so much **BECAUSE** of the media lies which are backfiring on those who put out such hype. And, it's obvious most are not thinking of hunting, or protection from criminals, with all those magazines.

[Click at this article](#) about people buying 3 years worth of magazines in 3 days.

Does this mean civil war in the U.S.? Probably not! Why? Because the people are waking up fast. Asleep, and complying like sheep, the wolves would come. Awake, the wolves usually stand back. History shows this to be true. They may be psychopaths, but they are intelligent. And, there are enough guns and ammunition in the hands of the people in the U.S. to equip the armies of several countries.

What does all this have to do with world peace and spirituality? Our intent is world peace, and peace within. But, that's not peace at any price. That's not laying down on one's back, like a sheep, and having one's guts torn out by the wolves.

I've often quoted Gandhi, and his “be the peace you want to see in the world.” Our other organization, [WE ARE CHANGE](#) is based upon that quote. But, [Gandhi did not believe](#) in the type of pacifism in which one is forced to be helpless against dangerous oppression, or genocide. He did not want to start an armed insurrection, which is admirable, but he was definitely for defense by whatever means are necessary.

Gandhi wrote:

***I do believe that where there is only a choice between cowardice and violence I would advise violence.***

Spiritual awakening, which is happening right now all over the world, is automatically bringing political awakening.

Violent crime in the U.S. is very low where gun ownership is prevalent. It is very high in areas where guns are restricted. It is obvious that the presence of guns reduces violence. Burglaries are almost non-existent where many home owners have guns.

What is spiritual awakening in the dangerous world we are facing right now? First, it is recognition that our bodies, and our thought process, is not all there is to our existence. We exist apart from this space, or this time. Because of that, our physical lives are not more important than our liberty. At the inception of the United States the people maintained liberty for themselves and their posterity with that perspective.

It was Patrick Henry who said...

***Give me liberty, or give me death.***

So, in the U.S. And throughout the world, we have a rapidly awakening population.

And, what does that lead to? It brings us peace and prosperity. Far more than the square root of 1 percent of the world's population is in a state of inward peace. The numbers who are causing peace, through this inward condition, are growing exponentially. Do you know how many times WWII has almost started? Do you know how often full blown martial law (military rule) has almost come to the U.S.? Why almost? Because so many are in a state of inward peace. But, outward action: preparation and communication, should accompany that inner state.

But people who have inward peace, many of them are prepared for the worst. Being prepared does not mean one is looking for it, just that they are ready.

I've written a book about how **THE NEW WORLD ORDER IS DYING**. The psychopaths who run this system are bloodthirsty, and very cruel. It's important to see what changes are coming about in our world that prove their system is crumbling. [Click here](#) to find out more about the book which you may order online. You will learn survival techniques, some of which are very important. Do you know how to get water out of a dry ground with a shovel and a few other items that can be easily carried in a backpack? People can die without water in a matter of days, so that's very important.

One way their system is falling apart in the U.S. Is nullification. They write laws, and States, and counties, nullify them. This is legal, and effective. In the county I live in, I presented a resolution to nullify the NDAA which was nullified in 4 other counties of this state. Find out more about that in the Huerfano County section of [this web page](#).

In other parts of the world their system is also crumbling. In Iceland, they threw off the **NEW WORLD ORDER** economic, and other, control. Iceland is now a free country.

I've recently written [an article](#), titled ***The Pathology of Blind Denial***. It is useful if you have relatives, or friends, who are not awake. It will serve you well to read the psychological mechanisms that cause people to stay asleep, and to be like sheep ready for slaughter.

I hope this message finds you in a state of inward peace, and love, at a time so many are referring to the Prince of Peace, Jesus Christ. Peace, love, and good will to all.

Bruce Kettler
